The abstract of the disclosure is objected to because it should be written as one paragraph. Correction is required. See MPEP § 608.01(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 40-42, 44, 45, 47-49, 52, 53 and 58 are rejected under 35 U.S.C. 102(b) as being anticipated by Sellet.

Sellet discloses urethane prepolymers with hydroxyalkyl carbamate, aldehyde and alcohol (example I), which is the same process shown in the disclosure of the application to obtain the structures of claims 40, 44 and 45. In example I, he uses a cyclic diisocyanate to make the prepolymer. He discloses reacting the alkylolated or etherified polyurethane carbamates with epoxide containing resins (top col. 14), and, in examples XXVII and XXX, he shows further triamine crosslinking agents.

Claims 43, 46, 50, 51, 54-57 and 59-80 are objected to for depending on rejected claims.
